Describe Proposed Operations (Clearly State all Pertinent Details, and Give Pertinent Dates, Including Estimated Date of Starting any Proposed Work). Use additional page(s) if appropriate.

The SBRRU 44-14H original Red River "B" zone lateral has been squeezed and a window will be cut in the 7" csg above 8128', which was kick off point for the original well. A build section will be drilled out of that window to the SE and 4 1/2" csg will be cemented through the build section up into the 7" csg. This should seal off all porosity zones between the window and the "B" zone porosity. Openhole will be drilled to the SE through 4 1/2" csg & through Red River "B" zone to the bottom hole as shown.

I hereby certify that the foregoing as to any work or operation performed is a true and correct report of such work or operation.
